

SAP TM Consultant

Your tasks with us:

- Evaluation of customer-specific business processes in the area of SAP TM with a focus on their technical feasibility
- Creation of functional specifications, analysis of technical requirements and development of solution architecture in cooperation with the development teams
- Independent implementation of sustainable solutions in the context of customizing and elimination of operational problems
- Conception and configuration of interfaces of different technologies, e.g. Webservice, XML, bgRFC, qRFC, OData-Service, IDoc

What we want from you:

- Ideally 3 years of project experience in SAP TM with a focus on freight order management, freight agreement management, capacity planning and invoicing
- Your analytical thinking skills enable you to think outside the box and create optimal solutions for our customers
- Knowhow around the SAP BOPF framework as well as in terms of web services for system integration
- Good understanding of SAP TM related technologies for example RFC, BAPI, BAdI, enhancement implementations and BRF+
- Besides ABAP, debugging should be no foreign word for you
- Good communication and presentation skills
